

We have evidence that investing in pharmaceuticals will make you feel better.

Open wide, it's time for your medicine. All of us at various times in our life have been made well again thanks to the work of talented people at the pharmaceutical companies across the world.

The current global pandemic being battled by many of these companies underlines just how important they are in making our daily lives better.

At Elevation Capital, through our Global Shares Fund, we've been investing our clients' money in the pharmaceutical industry over the past twelve years. Upon examination of the charts, you'll see that the Fund has been very efficacious indeed, delivering net returns of +11.49% per annum over the last 5 years*. A complimentary side effect of this is our investors tell us it makes them feel much, much better.

*As at 31 July 2021 and based on a 28% Prescribed Investor Rate (PIR).
Past performance is not an indication of future results.

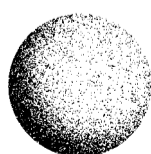

Of course it's not just Bayer, Pfizer, Viatrix and GlaxoSmithKline that we invest in. The Elevation Capital Global Shares Fund maintains a measured dose of world leading companies such as Alphabet, Intel, Disney and EssilorLuxottica to name a few.

We would be happy to prescribe the same medicine for you if we may. It's completely affordable from as little as \$100 initial investment and then just \$25 a month.

If you'd like to feel better too, make an appointment and talk to us today on 0800 353 227. It won't hurt a bit.
